

Passaic Valley Water Commission

Supervising Engineer

System Overview: The Passaic Valley Water Commission (PVWC) is one of the largest and oldest water agencies in the Northeast. We are a public drinking water supplier owned by the cities of Paterson, Clifton, and Passaic. Our 225 employees supply water to nearly 800,000 people with demand averaging approximately 80 million gallons per day to the municipalities of Paterson, Passaic, Clifton, Prospect Park, Lodi, and North Arlington, and 22 wholesale customers.

PVWC owns and operates the Alan C. Levine Little Falls Water Treatment Plant, which underwent an extensive upgrade in 2001 to use ozone technology for treatment. It was the largest drinking water treatment plant in the world employing this technology, and it remains a model for treatment operators from around the world to emulate. Our process is tuned for optimum treatment of the nature of our water supply to remove particulate matter, pathogenic bacteria, and organic contaminants.

PVWC has approximately 65,000 service connections. The system also includes over 650 miles of mains ranging in size from 4 to 51 inches in diameter, 3,000 fire hydrants, a complete meter repair, and testing department, two maintenance yards and warehouses, and a corporate office. We operate three finished water reservoirs with a combined storage capacity of 250 MG, and we are evaluating adding an additional 75 MG. PVWC has removed more than 34,800 utility-owned lead service lines since the 1980s, and our Lead Service Line Replacement program offers replacement solutions for customer-owned service lines.

PVWC is dedicated to the communities we serve. We know how important it is to provide our customers with high-quality drinking water, reliability, and service. We have been serving the citizens of Northeast New Jersey since 1849 and will continue to in the years to come.

Opportunity:

Supervise field and office engineering projects within the Department. Assign, check, and supervises the work of lower-level engineering Staff. Review and make updates to Departmental policies and procedures and work with an engineering staff for implementation and improvements. Develop bidding documents for construction and recurring procurement contracts. Oversee the review of developer site plans.

Passaic Valley Water Commission

Education:

Passaic Valley Water Commission (PVWC) is seeking a highly qualified, motivated candidate having a New Jersey Professional Engineer's License, and a Bachelor's of Science or Masters of Science Degree in Civil, or Environmental Engineering, for a position as Supervising Engineer.

NOTE: Applicants who do not meet the above educational requirements may substitute additional experience as indicated below on a year-for-year basis with thirty (30) semester credit hours being equal to one (1) year of experience.

Experience:

Four (4) years of experience in civil, mechanical, chemical, or electrical engineering, one (1) shall have been in a supervisory capacity. The optimum candidate will be an energetic, self-starter with significant relevant experience and a strong desire to continue to learn and grow in their professional capacity in the water industry.

PVWC offers a competitive starting salary, a strong opportunity for growth, and excellent benefits.
