Exit 6 Ramp off Route 21 North will be Closed for Several Days as 16-inch Water Main is Repaired

FOR IMMEDIATE RELEASE

(Clifton, N.J. – April 17, 2023) Beginning tonight at approximately 6:30 p.m., Passaic Valley Water Commission (PVWC) will be repairing a break in a 16-inch water main located under the Exit 6 ramp off Route 21 North in Belleville.

During this time, commuters who would normally use Exit 6 will need to use an alternate route.

Repairs are anticipated to last about one week. Customers in North Arlington may continue their normal use of water, however, a slight drop in pressure could occur at any time during the work period.

PVWC appreciates local and state authorities for working with us around-the-clock to address this issue as quickly and safely as possible. PVWC thanks its customers for their patience during this time. Anyone with questions or concerns may call PVWC's customer service department at 973-340-4300.
