Passaic Valley Water Commission will be making repairs to a 51-inch Water Main

FOR IMMEDIATE RELEASE:

(Clifton, N.J. – February 24, 2023) Starting the week of February 27, 2023, Passaic Valley Water Commission will be making repairs to a 51-inch transmission main that provides water service to areas of Elmwood Park, Garfield, Harrison, Kearny, Lodi, Lyndhurst, North Arlington, and Wallington.

These repairs are anticipated to be completed on or about Monday, March 6, 2023. During this period, your water will be provided from a different water source. This may produce discolored water and/or lowered water pressure at any time while the work is being performed. Customers are encouraged to confirm their water is clear before washing clothes. Should customers experience low pressure or discoloration, please call PVWC's Customer Service Department at 973-340-4300.

Passaic Valley Water Commission assures customers that the water meets all water quality standards as set forth by the US E.P.A and the NJDEP. These improvements will help us to continue to give you dependable water service.
